

NARISHIGE WEB NEWS

No.067 (September 14, 2012)

Contact Narishige for customizing idea, your own product will be made just for you.

Narishige manufactures a variety of micromanipulators; three-axis oil-hydraulic joystick micromanipulators, stereotaxic micromanipulators, miniature micromanipulators small enough to be arranged on the top of a microscope stage, and also other instruments. The other instruments include instruments for chronic experiments and micropipette pullers and microforges, etc.

Narishige has been manufacturing many types of products which can meet varied customer's requirements, and maintains the production system that allows distribution of the wide range of products.

"I wish this bar was a little longer...", "If only the working range was 5mm longer...", etc., do you have such requirements in your particular application?

Narishige is running with a structure that can provide a solution for such requirements.

Need a smoother drive unit Want a 90 degree

Want a shorter bar It must be parallel

Combine the drive unit with the other

With a lower angle Bigger screws

Cut the holder in short Less thick

Make the plate longer Add a scale

Need a water hydraulic one Higher

Change it Want a V-shape groove

Curve the edges of unit Make it lighter

Want the longer tubing A little shorter

With a longer bar Need a connecting unit

Is there a motordriven Change it to a plastic one

Narishige serves you with craftsmanship.

It has been, and always will be.

When you think to have "an instrument that meets your particular needs," please feel free to contact Narishige. We serve you to materialize your ideas as much as possible basing on our accumulated experience and achievements.

Narishige Scientific Instrument Laboratory was established with the policy of "Be a machine shop of the world," and as a good partner of researchers, has been manufacturing varied equipment and instruments. Narishige Group will maintain this policy.

If you have any questions or need further information, please contact us.
