

The 60th anniversary of foundation and 2nd anniversary of our founder's passing

Narishige Group was founded in 1953 and commemorates the 60th anniversary of foundation this year. We gratefully acknowledge your support with deepest appreciation.

In late October 2013, we held a celebration to commemorate the 60th anniversary of foundation in a hotel in Shinjuku, Tokyo having a lot of guest visit and congratulations despite a typhoon approaching. This issue of Narishige Web News reports the event and atmosphere of the celebration party.

In the celebration party, we presented how many Narishige products were given birth and have been fostered by the interaction and cooperation with researchers since the time when the deceased founder Eiichi Narishige had formed the company. Then, the long experienced company members who created the base of the company while now also backing up young staffs, and the next generations who are going to lead the company, were introduced to the guests.

This year is also the second anniversary of the passing of our founder, Eiichi Narishige. Many guests associated with him shared with us their fond memories and interesting stories which impressed us anew of his greatness and made us also feel him as "the great founder" forever.

His motto was "Be a machine shop of the world" which is now our corporate philosophy. We continue to work hard making it the principle.

The ceremony was successfully closed and made us reacknowledge the weight of history. We will continue our efforts for the next 10 years' history. We will appreciate your continued help and encouragement.

If you have any questions or need further information, please contact us.
